

# Google Chrome: Clearing Cookies

## Google Chrome: Clearing Cookies

When you use a browser, like Chrome, it saves some information from websites in its cache and cookies. Clearing them fixes certain problems, like loading or formatting issues on sites.

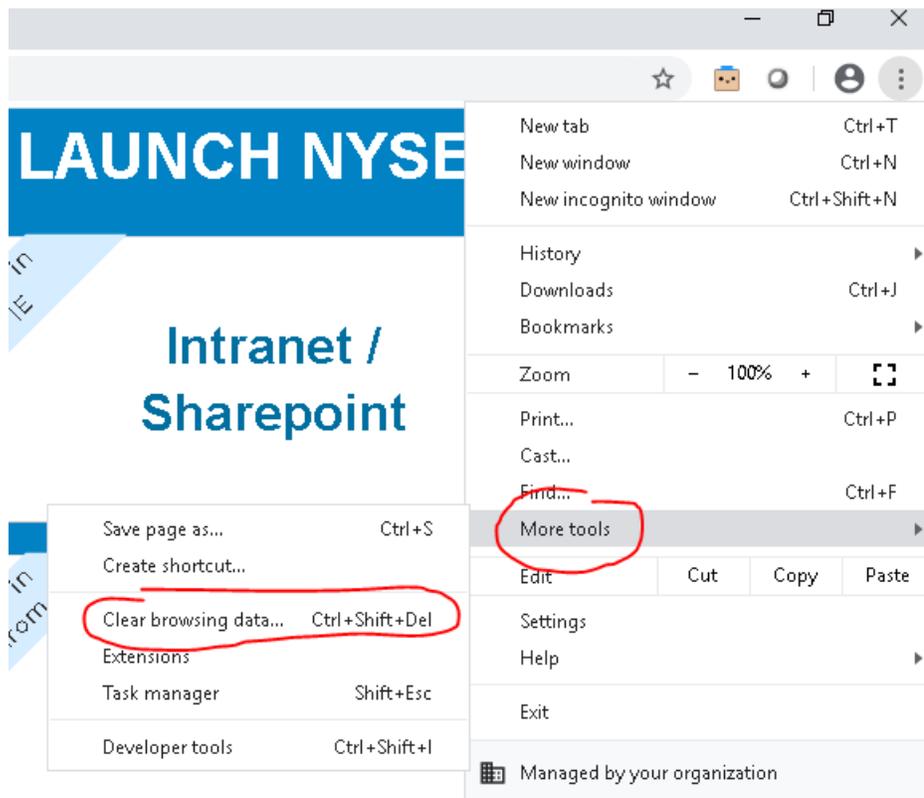

1

On the top right hand portion of Chrome, click the three vertical dots:

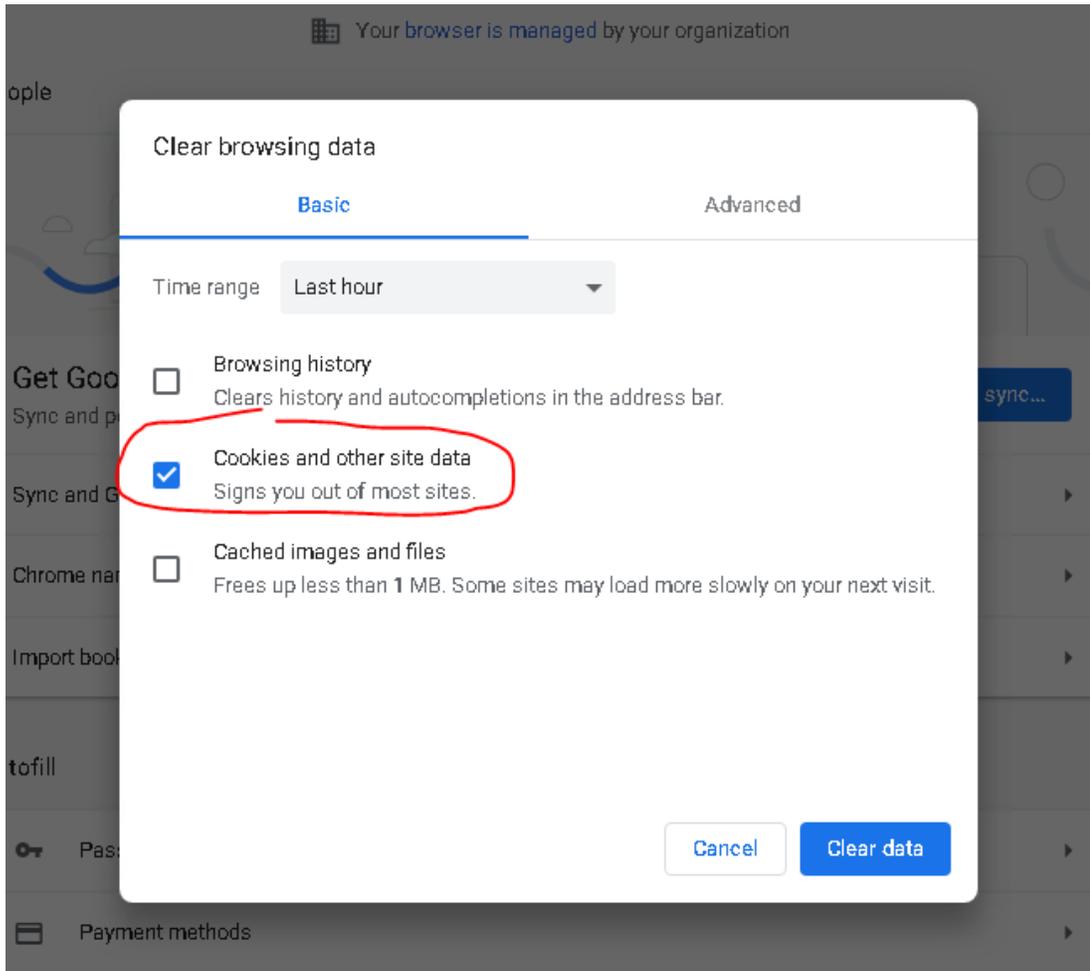

2

Select More tools & then "Clear browsing data"

3

On the new window that comes up uncheck "Browsing history" & "Cached Images and files" so that "Cookies and other site data" is the only box checked.

4

Close out and reopen Chrome to complete.
