

Keeper Security: Additional Training Resources

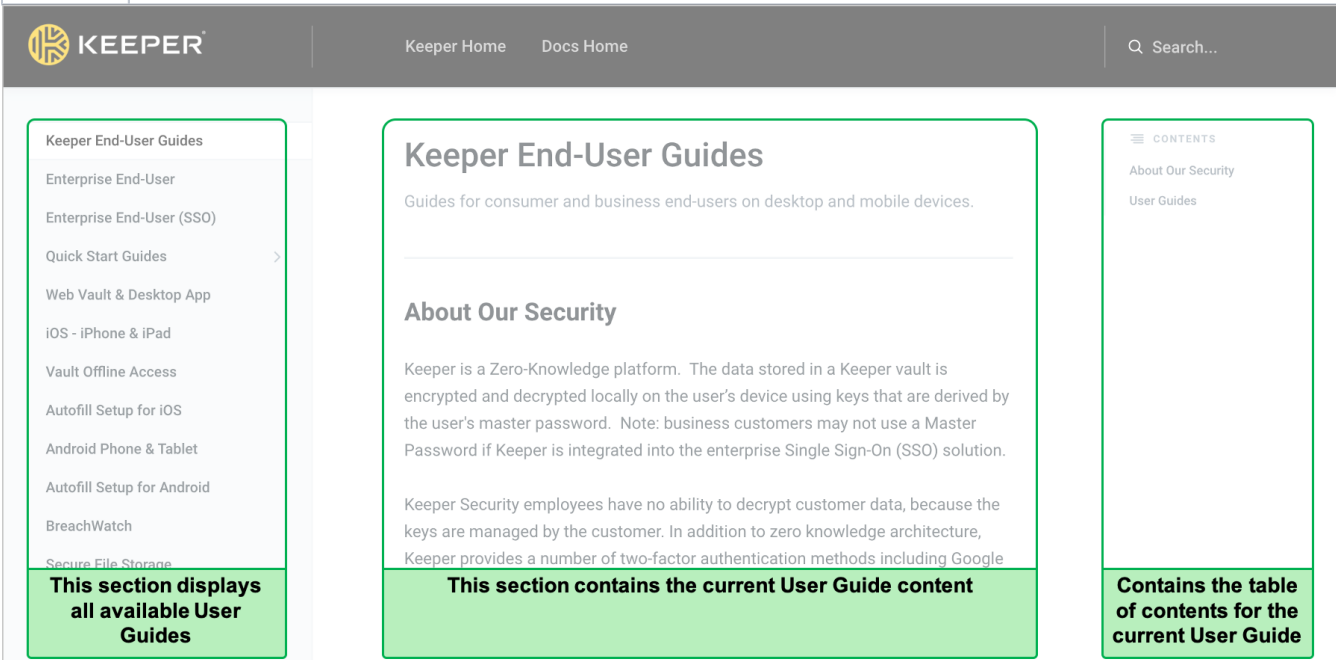

System Instructions

Introduction

The Keeper Security Training Resources listed below are links to resources available on the Keeper Security website. These materials were not created by NYSERDA and accessing these links will bring you to an external website not affiliated with NYSERDA. Additionally, not all training content available on the Keeper Security website will be displayed on this page. Only a handful of curated User Guides and Video Tutorials were included that represent a comprehensive overview of the Keeper Security application.

User Guide Website

Link	Description
Keeper Security User Guides	This page contains all Keeper Security User guides, some of which do not apply. The left hand Navigation Pane on this page provides direct access to each User Guide on the Keeper Security website. See below for an instructional screenshot that will give context to the different areas of this website.

Curated User Guides

Link	Description
------	-------------

Web Vault & Desktop App	This user guide reviews how to set up and use the Keeper Security both the cloud and desktop versions of Keeper Security. Expand the link below to review all the relevant topics in this User Guide that would be beneficial for you to review. Some topics that are currently in this User Guide we not included in the link below because the information in them, generally, does not apply to NYSDA.	
	Table of Contents	Description
	Master Password Login	This section contains two parts. The New User Registration part will walk a user through setting up their Keeper Security account. NYSDA does not use Enterprise SSO Login at this time so this part can be skipped.
	Creating Records	This section reviews how to create new Records in Keeper Security. Records are used to store Website Username and Password information.
	Importing Passwords	This section reviews how to import Usernames and Password already stored in other applications such as your Web Browser, alternative Password Management applications or from a Text (.csv) file. If you do not currently use other programs to store and manage website usernames and passwords, this section can be skipped.
	Creating Folders and Subfolders	This section reviews how to create Folders in Keeper Security to more efficiently organize Records. This section also contains one additional part (Moving & Shortcuts) that reviews how to move folders and records and create shortcuts for each.
	Search Feature	This section reviews how to search for and filter Records, Folders and Payment Information you have stored in Keeper Security.
	Password Generator	This section reviews how to use Keeper Security to create passwords for you.
	Custom Fields	This section reviews how to use Custom Fields in a record. This is only useful when access to a website requires more login information that just aUsername and Password.
	Auto-Launch	This section reviews how to launch a website and pre-fill login in information right from within the Keeper Security application.
	KeeperFill	KeeperFill is the name of the Browser Extension that can be added to your internet browser. This section reviews how to auto-launch a website and pre-fill login information right from within the Keeper Security Browser Extension. Additionally, this section has one additional part that reviews how to change website password using KeeperFill.
	Sharing Records & Folders	This section reviews how to share records and folders with other users. You can only share records or folders with users who have active Keeper Security licenses.
	Record History	This section reviews how to access the history of a Record in your vault.
Vault Offline Access	This user guide reviews how you can access your Keeper Security Vault when you do not have access to the internet.	
iOS - iPhone & iPad	This user guide is similar to the Web Vault & Desktop App guide but references the instructions for iPhones and iPads.	
Autofill Setup for iOS	This user guide reviews how to use the KeeperFill application on your iPhone or iPad to auto launch and auto fill a websites login information.	
Android Phone & Tablet	This user guide is similar to the Web Vault & Desktop App guide but references the instructions for Android phones and tablets.	
Autofill Setup for Android	This user guide reviews how to use the KeeperFill application on your Android phone or tablet to auto launch and auto fill a websites login information.
