Campaign Codes

With the EmPower+ Application, CLEAResult Shared Services, Contractors, Participating Utilities, and Community Organizers can create Campaign Codes from their Salesforce Application Portal. Once a campaign code is created, a web link will be generated that can be posted to a website or shared with an applicant through email.

- Campaign codes generated by Contractors or Community Organizers will prepopulate the associated fields on the Partner Information page of the online EmPower+ Application when the customer initiates an application through the associated web link.
- All applications initiated by the customer through a campaign code generated web link, will be associated with that campaign code and trackable via a linked report.
- All entities with access to generate a campaign code can set up multiple campaign codes to track different marketing outreach efforts through Salesforce.

To create a Campaign Code, log into Salesforce.

Access the Generate Campaign tab.

3

On the Generate Campaign tab, a list of all campaigns created by the logged in user are displayed. To create a new Campaign, click Generate Campaign.

4

A modal window will open. Click OK to confirm the request to generate a new Campaign Code (and URL).

CONFIRM × Are you sure you want to generate a new Campaign URL for the Combined Residential Application? OK CANCEL

(5)

Back on the **Generate Campaign** tab, the newly generated **Campaign Code** will appear on the top of the list. Be sure to check that the **Campaign Code** status is set to **Active**. The Campaign URL can be copied and pasted for use in websites or shared through email.
